

Experiment 6

Name: Paarthiv Suriya Sundaram Nagarajan

Roll No: 240701376

AIM:

Simulate the life cycle stages for UI design using the RAD model and develop a small interactive interface using Axure RP.

OBJECTIVE

- To understand the RAD model
- To design user interface screens
- To develop an interactive prototype
- To improve user experience through rapid design

TOOLS USED

- Axure RP 11

THEORY

The **Rapid Application Development (RAD)** model is a software development approach that focuses on quick development and user feedback.

It consists of four main phases:

1. **Requirement Planning** – Identifying user needs
2. **User Design** – Creating UI layouts and prototypes
3. **Construction** – Developing the working model
4. **Cutover** – Testing and final implementation

RAD is useful for UI design because it allows fast prototyping and easy modifications.

APP NAME

StudyMate – Assignment Management App

RAD MODEL IMPLEMENTATION

1. Requirement Planning Phase

Description

In this phase, the requirements of the application are identified.

Details

- Target Users: Students
- Purpose: Manage assignments and deadlines
- Features:
 - Login system
 - View assignments
 - Add assignments
 - Profile management

2. User Design Phase

Description

UI screens are designed based on user requirements.

Screens Designed

- Splash Screen
- Login Screen
- Dashboard Screen
- Profile Screen

Design Features

- Simple layout
- Easy navigation
- Clean interface

3. Construction Phase

Description

Interactive prototype is developed using Axure RP.

Implementation

- Created pages in Axure RP
- Designed UI elements (buttons, text fields)
- Added interactions using **OnClick events**

Navigation Flow

- Splash → Login
- Login → Dashboard
- Dashboard → Profile
- Profile → Logout → Splash

4. Cutover Phase

Description

Final testing and evaluation of the prototype.

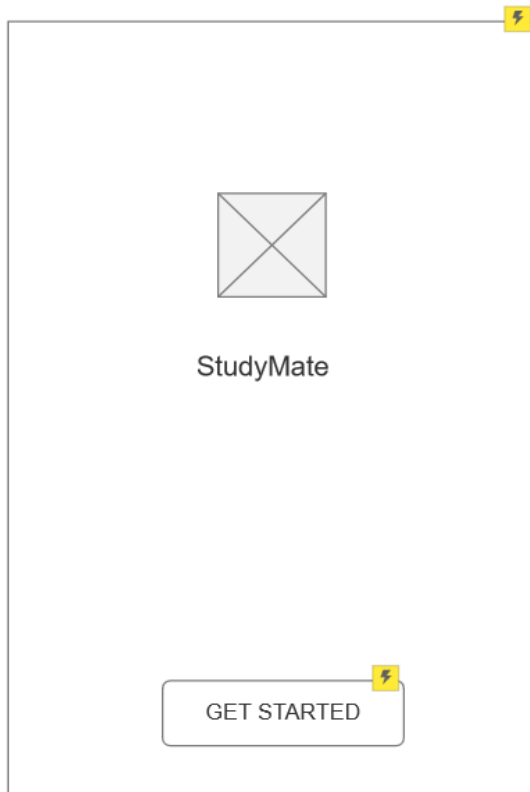

Testing Done

- Checked navigation between screens
- Verified button interactions
- Ensured smooth user flow

PROCEDURE

1. Opened Axure RP 11
2. Created a new project
3. Added multiple pages (screens)
4. Designed UI using widgets
5. Added interactions using OnClick events
6. Tested the prototype using Preview option

1) Splash Screen

2) Login Screen
